

## Updated Animations Ready for Video Booklets

With the recent laws and changes to retirement plans, we decided to do a complete overhaul of our video animations. We now have a completely new look for our video animations that are also SIS compliant. For all advisors who have ordered custom-branded video books, you can visit our school page and download all the videos easily. Make sure to delete the old ones so you don't accidentally add them to your video books!

We've already updated the animations on your websites, and we are working on updating the drip email campaign in iContact. We'll keep you updated when they've been completed within your account.

## New Look, New Video

We've completely rebuilt these videos with new characters and now they're in color! We've also updated any outdated information due to recent law changes and made the videos more evergreen to minimize future changes.

We've also created a new video on Taxes & Fees that you can start utilizing right away (see the link below).

## Personal Videos

Many advisors are also recording personal videos to prospects and adding those to their custom-branded video book. It adds a great personal touch as the first video for a specific prospect. I recommend recording a personal video and then choosing 2 video animations to add as well. Some advisors also add their sizzle reels or welcome videos to the video books, which is excellent for posturing. Below are some examples you can view. If you want a sizzle reel, just send an MOF to the Marketing Team and they will put one together for you.

## Custom-Branded Video Books:

The custom-branded video books are a great tool to get more 2<sup>nd</sup> appointments scheduled and increase overall closing ratios. Compared to just delivering the animations via email and through drip campaigns, tangible books have more traction and overall results.

- Excellent for posturing, branding, wedging, and the Sales Process, delivered in a fun, easily digestible format.
- Video books get opened multiple times, shown to friends/family, and have a much longer “shelf life.”
- Emails tend to get “lost” or forgotten about and may end up in spam folders.

You can **choose any 3 animations** to add to each specific book, so they are **customized per prospect** (all the books can be different!). You can also **add a personal video** to the books as well, for a private message to a prospect or for a specific campaign. Below are the instructions on how to add video animations to the books.

1. Plug the video book into your computer using a USB cable:

2. Choose which three animations you would like to add for the specific prospect, then copy/paste them into the video book. It should only take 30 seconds for the video file to be added to the book.
